Please allow 4-6 weeks preparation time and shipping. Wood is very heavy, and very expensive to ship. Not all pieces are available nationwide. Complete courses are usually shipped via private treaty. Orders less than 300 pounds may ship disassembled via UPS. **Please note: All wood cracks and ages over time. The rate of cracking depends upon many variables including use, humidity, and temperature variability. We try to select the best quality lumber available, however we cannot be responsible for cracking of wood products. You can choose to have us crack fill the wood rails for an extra cost, prior to painting them, which delays the appearance of cracking.**
